You should already have our comments on the previous workplans. Charles, Ron, Dave, and wrote up comments before Ron retired. I can't remember but I think they may have been sent by Charles

Stuart, thanks. Do you have any comments on the first five SSFS workplans?

DeAndre
Given Dave and Stuart's workload, we will need two more weeks. Also, the reviewers cannot respond on behalf of the NRRB but can respond individually in their areas of expertise. However, Stuart and Dave would likely be consulted by the Board on any future review or consultation in their areas of expertise. Ron Wilhelm has retired from the Agency.

Hi Doug,

We are working closely with our Administrator and other members of Senior Staff here in the Region to ensure we stay on track with this project due to the amount of public interest that exists. Dan never got a response from his email on Friday one way or the other. I wanted to follow up to see if Headquarters had a date in mind that we might receive comments so that we may continue moving forward as we have already received comment from the state department. I appreciate the assistance you have given in

addressing this matter.

Thanks!

Subject: West Lake Landfill: SOW for Fate and Transport Modeling (sixth and final SSFS workplan)

Doug, Dave, Charles, Ron and Stuart:

Attached is the sixth and final workplan for the West Lake Supplemental SFS analyses requested by the National Remedy Review Board. The first four were sent to you (through Amy Legare) in an e-mail dated November 15, 2012, and the fifth was sent directly to you in an e-mail dated February 5, 2013.

It is my understanding that you have been tasked to review these workplans for compliance with the NRRB's comments/requests on Region 7's "early consultation" presentation on the SFS report, in lieu of a review by the NRRB itself as I originally requested. In a conference call with you on January 9, 2013, you indicated that you would not provide comments on any of the six SSFS workplans until you had all six of them to review.

You now have all six workplans that comprise the scope of the SSFS as defined in the Region's letter to the OU1 PRPs of October 12, 2012. I request that you provide me your comments on these six workplans by Friday, May 10, 2013. If you have any questions or need me to re-send the earlier workplans, let me know ASAP.

Sincerely,

Daniel R. Gravatt, PG
